Application/Control Number: 10/768,350

Art Unit: 1632

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dr. Rashida Karmali on April 4, 2006.

The application has been amended as follows:

1. Claim 1 has been rewritten as follows:

A germline-competent black B6 ES cell from C57BL/6 mouse strain, wherein said cell line is IC1.

2. Claim 2 is rewritten as follows:

A germline-competent white albino B6 ES cell line from C57BL/6J-Tyr <sup>c-2J</sup> mouse strain, wherein said cell line is IAC1.

3. Claim 3 has been rewritten as follows:

A method of generating a transgenic chimeric mouse, wherein said method comprises:

introducing a transgene construct into a cell of the IC1 cell line, wherein the transgene construct is stably integrated in the genome of said cell,

Art Unit: 1632

injecting said cell comprising the transgene construct into a C57BL/6 blastocyst, wherein said blastocyst is transplanted into a pseudopregnant mouse, and allowing said blastocyst to develop into a chimeric transgenic mouse.

## 4. Claim 5 has been rewritten as follows:

A method of generating a transgenic chimeric mouse, wherein said method comprises:

introducing a transgene construct into a cell of the IAC1 cell line, wherein the transgene construct is stably integrated in the genome of said cell,

injecting said cell comprising the transgene construct into a C57BL/6 blastocyst, wherein said blastocyst is transplanted into a pseudopregnant mouse, and allowing said blastocyst to develop into a chimeric transgenic mouse.

The following is an examiner's statement of reasons for allowance: the claimed invention is drawn to new ES cell lines obtained from black and albino C57BL/6 mice. As the ES cells are novel, the method of using them to generate transgenic, chimeric mice is novel as well.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public. For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
